

There is a dedicated state-wide group of medical professionals involved in pushing back against the Andrews Government's Healthcare Amendment (Mandatory Vaccination for Healthcare Workers) Bill 2020. If you are a healthcare worker, a nurse, a doctor, a cleaner, a cook, a dentist, a clinician or indeed you work out of a hospital setting in any capacity at all, this legislation will affect you.

If you would like to get involved in the campaign to save bodily autonomy and promote informed consent free of threat or coercion, please contact the email below: [healthfreedomvictoria@protonmail.com](mailto:healthfreedomvictoria@protonmail.com)

The time to stand up and join other medical health professionals as we push back against the dangerous precedent this legislation takes is NOW.

Our strength lies in numbers.
